

COVID-19 Employee Testing & Research

Vital Statistics Consulting

Establish Goals

VSC subject-matter experts interview senior personnel to identify goals of COVID-19 testing and establish the value of data to the individual and organization.

Develop a Plan

Our research team isolates the optimal testing regime (PCR and/or serology) and develops a research protocol, data collection tool, and analytic approach.

Implement the Plan

In cooperation with your organization, our team executes COVID-19 testing. We manage secure data collection & transfer, perform analyses, and report findings.

Apply the Findings

Our experts review the analytic findings with your leadership to determine their utility to guide organizational work and safety protocols.
